The Giant Technology

Acclaimed by major drum magazines as the drum pedal innovation over the past years, Sonor's Giant Step is a state-of-the-art range of pedals for the most demanding players. Giant Step pedals feature the ultimate in sensitivity, speed, and ergonomical function. A new innovative design and maximum versatility due to an extensive line of pedals and accessories make Giant Step a class of its own.

From the Target Point foot board design to the docking station, every aspect of the Giant Step range has been designed with utmost care and attention to detail.

A choice of Twin Effect, Single, Double, Triple and Middle Pedals allows every drummer to find the perfect 'Giant Step' for his individual requirements.

Docking Station
The docking station is mounted to the bass drum hoop and stays there.

Smart Connect System
The "Smart Connect" System ensures a quick and effortless attachment of the pedal with an adjustable ball clamp through a firm lever mechanism. A cylindrical axle connection neutralizes any possible tensions through different bass drum angle positions.

Beater Cams
The angle of the beater cams can be adjusted independently without changing the position of the boards.

Spring Mount
Equipped with high speed needle bearings the spring mounts can easily be exchanged for the use of alternative types of springs.

Rotation Pendulum
The "rotation pendulums" with roller bearings work without any loss of energy and allow for maximum action and dynamics.

Power Rod
A power rod with ball bearings transmits the action from the heel board with high precision and without loss of energy into a kick action.

Targets
In order to allow for an ideal playing positioning the playing height of the target can be adjusted independently. This gives a perfect balance of foot and pedal.

Splitboard
Four high speed roller bearings which are integrated into a crossbeam "split" the "board" at this position.

Anti Slip Rubber
Secure hold on any surface.
The bass drum plate has an anti-slip rubber profile with self-adhesive velcro.

Silent Chain Drive
All Giant Step pedals are equipped with a chain drive. An exchangeable strap is included as well.

Giant Step Bag
All Giant Step Pedals are supplied standard with a heavy duty nylon carrying bag.
