

Thank you for showing your confidence in us by purchasing the BEHRINGER ULTRA BASS CHORUS BUC400. This ultimate effects pedal is specifically designed to match the range and applications of bass guitars. Thanks to its high-performance features you get super thick chorus with unbelievable stereo effect.

The chorus effect slightly detunes the original signal. A very pleasant detune effect is created relative to the pitch variation. The chorus effect is often used for dispersing signals.

## 1. CONTROLS

Top view

- [1] The *LEVEL* control adjusts the output level.
- [2] The *LOW FILTER* control lowers the amount of ultra-low frequencies in the effect signal to achieve more defined tone and avoid muddiness of sound.
- [3] The *RATE* control determines the chorus effect speed.
- [4] Turn up the *DEPTH* control to achieve a more full and deeper effect sound.
- [5] The *ON/BATT* LED illuminates when the effect is activated. It also serves as a battery level indicator.
- [6] Use the footswitch to activate/deactivate the effect.
- [7] Use this 1/4" TS *IN* connector to plug in the instrument cable.
- [8] The two 1/4" TS connectors *OUT A* and *OUT B* send the signal to your amp. Use both connectors if you want to achieve full stereo chorus effect. For mono use just plug in *OUT A*.

Use the *DC IN* connection to plug in a 9 V power supply (not included).

The *BATTERY COMPARTMENT* is located underneath the pedal cover. To install or replace the 9 V battery, press the hinges with a ballpen and remove the pedal cover. Be careful not to scratch the unit.

 The BUC400 has no on/off switch. As soon as you insert the jack into the IN connector, the BUC400 begins running. When not using the BUC400, remove the jack from the IN connector. This extends the life of the battery.

The SERIAL NUMBER is located at the bottom.
