Compact Flash (CF) Card Compatibility Guidelines

The following is a list of guidelines to help you choose a compatible Compact Flash card for the BR-864, BR-900CD and BR-600:

- Compact Flash Type 1
- 32MB - 1GB capacity. Larger cards cannot be formatted. (1GB is approximately 1000MB)
- Using major brands such as Sandisk, Panasonic, and Lexar is preferred.
- Important Note: Do not use cards that are considered "Hi Speed" or that are labeled "Ultra" or "Extreme". We recommend using cards that are 45X or SLOWER.
