

VERSION 2

project5

MUSIC.INSPIRED

MUSIC.INSPIRED

Blur the boundary between studio and stage, and capture the moment as it happens with Project5 Version 2.

■ Project5 is simply everything you need to create and perform today's music. Straight out of the box, you get

a complete set of superb quality instruments and effects; powerful recording, looping, sequencing, and arranging;

dynamic creation tools; and the ultimate open synth host. ■ Project5 Version 2 has been streamlined to put the

features you need most and larger than life sounds—easily in view and right at your fingertips. Project5 delivers

the solid real-time performance, stability, and ease of use of traditional hardware music workstations—but, with

the additional power, flexibility, and portability of PC software. ■ And Project5 is expandable—you have the

freedom to use hundreds of DirectX and VST plug-ins and instruments, and industry standard sample formats.

Now as both a ReWire Host and Client, there are even more possibilities to expand Project5 and extend your

music world. ■ Bring your inspiration to life, whenever and wherever the passion strikes, with Project5 Version 2.

1 In the Track Pane you can create, mix, perform, and record music with included instruments like Dimension multi-mode sampling synthesizer; patch ReWire clients like Reason or any DXi or VSTi; add ACID™-format loops; and record your own audio

2 Track Inspector gives you immediate access to the features you need for each track: instrument, effects, and arpeggiator settings; device chain presets; routing and control parameters

3 The editor allows you to edit patterns, loops, and automation in real-time, then send them to Arrange Pane or GrooveMatrix

4 Use the integrated GrooveMatrix to trigger individual loops and patterns or sets of loops and patterns; great for jamming or building a spontaneous arrangement for your song

5 Intuitive Arrange Pane allows for fast on-the-fly sequencing and editing of songs

Dimension

Inspiring Sounds

- Dimension™ multimode sampling synthesizer with over 3 gigabytes of professional content
- PSYN™ II full-featured subtractive synthesizer
- Roland® GrooveSynth™
- DS864™ multiformat digital sampler
- Velocity™ multilayered drum sampler
- nPulse™ analog drum synthesizer
- Cyclone™ DXi groove sampler
- Per-track real-time dynamic arpeggiator
- 10 included audio effects: tempo delay, mod filter, reverb, and more
- Hundreds of useful presets including device chain presets for quick setup of instrument, effect, and mix settings

PSYN II

Dynamic Creation Tools

- Responsive audio engine optimized for real-time use
- Ergonomic user interface makes the features and visual feedback you need easily accessible
- GrooveMatrix™ real-time pattern and loop trigger/arranger
- Layer synths, play splits from one controller, route multiple controllers to multiple virtual instruments
- Intuitive hands on control from MIDI keyboards and controllers
- Tap tempo

Alias Factor

Powerful Sequencing and Recording

- Complete pattern sequencing and arranging environment
- Integrated audio and MIDI recording and editing
- Step sequencer, live input, and advanced MIDI editing
- ACID™-format loop (re)construction with per-slice control of effects, pitch, and mix settings
- Multi-lane tracks for intuitive use of multi-timbral synths and advanced arranging techniques

Loop Editor

Open Host Environment

- Ultimate synth host with open support for VST and DirectX instruments and effects
- ReWire™ host and client for integrating with Reason™, SONAR™, Pro Tools™, etc.
- Support for industry standard and proprietary sample formats: ACID WAV, AIF, Akai S5000/6000, LM4, Kurzweil, Ogg Vorbis, Sound Fonts 2, SFZ, WAV
