## Recommended software for Charlie 1.0

This list groups each OS and sequencer successfully tested with Charlie.

Other applications that fully respect the VST2.0 implementation guidelines should be compatible with Charlie. Application not shown in the list may be compatible, but were not tested.

### PC/Windows:

#### OS:

Windows 2000 or Windows XP. Compatibility with older versions of Windows is not guaranteed.

#### Sequencer Formats :

**VST 2.0** (a.k.a "VSTi" or VST instrument)  
Logic Audio 5.5 & up (Logic 4 is not recommended)  
Cubase VST 5.1 & up  
Cubase SX 1.05 & up

Charlie can be used in DXi hosts with an adapter like DirectiXer or Cakewalk's own adapter. Please check our web site for details.

### Mac OS X

OS: 10.2.4 & up or 10.3.1 & up.

#### Sequencer Formats :

**VST OS X**  
Cubase SX 1.06/SX 2.0

#### Audio Units

Logic Audio 5.5 & up (6.3.1 recommended)

#### MAS

Digital Performer 4.0 & up

*NOTE: we strongly recommend DP 4.11 & up, featuring the new instrument tracks. Please use the **MAS** version of Charlie with DP 4.1, not the audio units or VST version.*

#### RTAS

Pro Tools LE & TDM: 6.1 & up (6.0 is not recommended)

*Please turn to page 2 for Mac OS 9.*

Paris, November 21st, 2003.

**Recommended software for Charlie 1.0**

This list groups each OS and sequencer successfully tested with Charlie.

**Mac OS 9**

**OS:** MAC OS 9.1 & up (9.22 strongly recommended).

**Sequencer Formats :**

**VST Charlie**

Logic Audio 5.5 & up (Logic 4 is not recommended)

Cubase VST 5.1 & up

**MAS Charlie**

Digital Performer 3.11 & up (with MAS 2.4 & up)

**RTAS Charlie**

Pro Tools Free: 5.01

Pro Tools LE: 5.1 & up

Pro Tools TDM: 5.1 & up

*Please consult the getting started/Pro Tools document to find out more about Pro Tools compatibility on OS 9.*

Key to abbreviation:

“& up” means “any update released after the specified version should work too”.

Thank you for choosing Charlie!  
The USB team.
