Totenschläger

CONGRATULATIONS

on your purchase of Totenschläger, part of our Tonebug series of effect pedals that combine stunning T-Rex tone, heavy duty design, and affordable pricing.

Totenschläger is a distortion pedal that anyone can use, but that's really tuned for metal and other types of high-distortion music. It delivers a gorgeous-sounding gain, whether you're just adding a dirty edge to your sound or going all the way with searing, sustained distortion. And with its 3-band graphic equalizer, Totenschläger puts YOU in charge of the shape and colour of your distortion.

Totenschläger is simple to set up and use. The following pages explain the different controls and offer suggested settings to get you started.

PLUG IN, AND TUNE TO TASTE...

Using your Totenschläger

Insert a 9V alkaline battery or connect to an electrical outlet using the T-Rex Fuel Tank power supply (not included).

Plug your guitar into the INPUT jack, and run a lead from the OUTPUT jack into your amp.

Use the GAIN knob to add distortion to your sound, and the LEVEL knob to set your overall output volume.

Experiment with the LOW, MID and HIGH sliders on the 3-band graphic equalizer to tune in your own signature distortion tone.
