TRIO QUICK START

① TEACH TRIO YOUR SONG

- Press the **FOOTSWITCH** to arm TRIO (LEARN LED will flash rapidly). Keep your guitar quiet until you are ready to strum the first chord.
- Start strumming in a steady rhythm. You are teaching TRIO a chord progression so play clearly and avoid embellishments.
- As you complete your chord progression, press the **FOOTSWITCH** just as you strum the same down-beat you started on. This is when you want the band to join in.
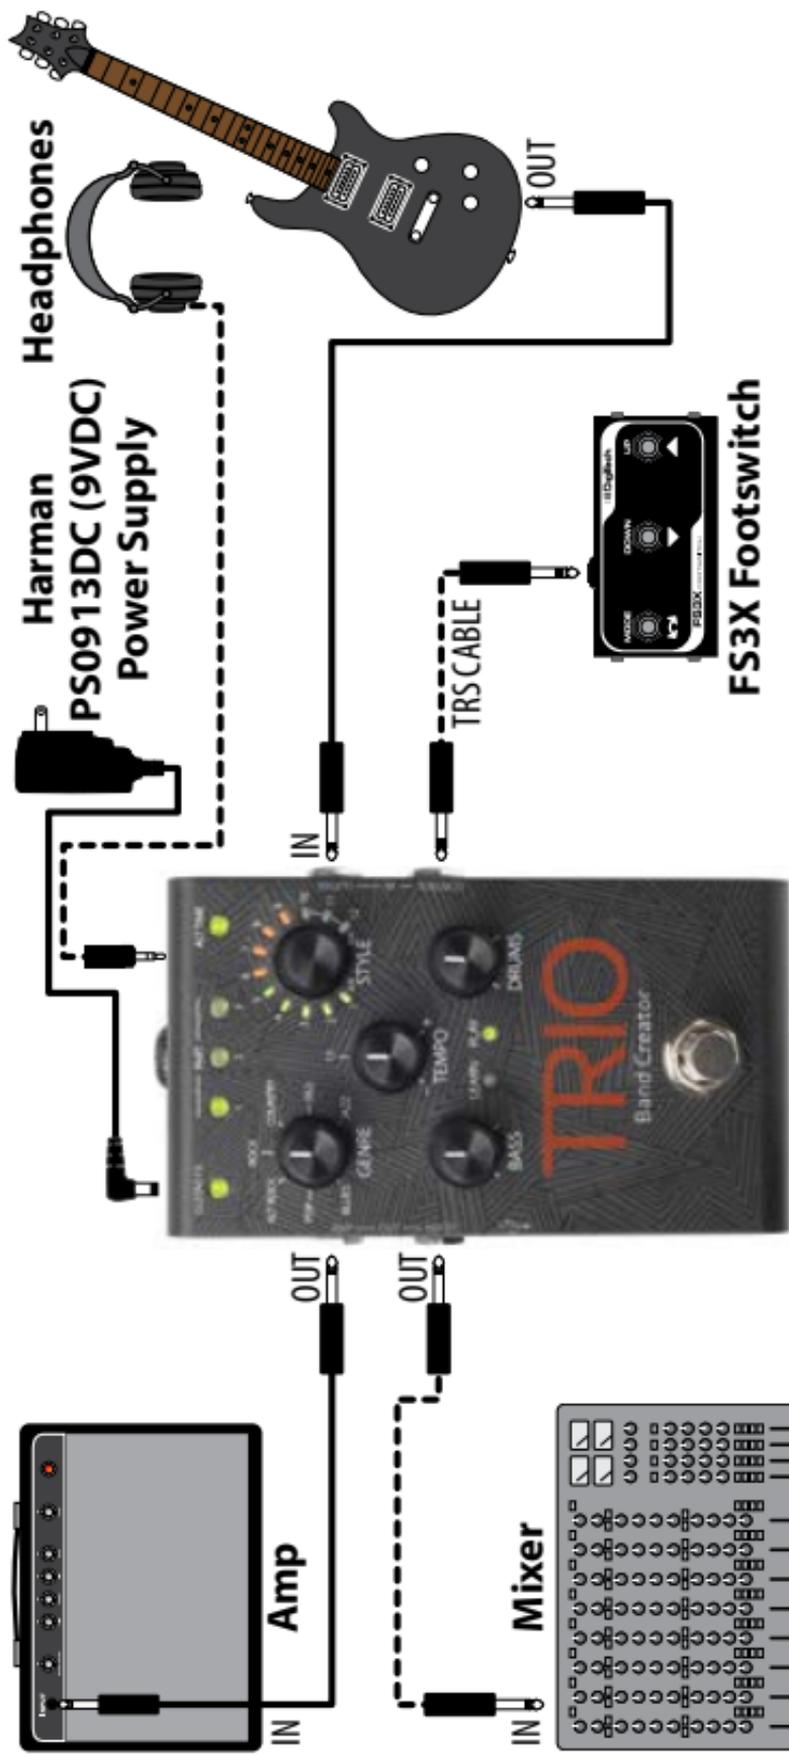

② FINE-TUNE & JAM

- Adjust **DRUMS** and **BASS** knobs to balance the levels of the band with your guitar.
- Adjust **GENRE** and **STYLE** knobs to try different variations of the song (STYLE LEDs light green or amber to indicate a style fit for your song with green being the best fit).
- Engage **GUITAR FX** button to apply effects to your guitar signal.
- Adjust the **TEMPO** knob or engage the **ALT TIME** button to change the song's tempo.

③ BAND CONTROL

- Press **FOOTSWITCH** once to start or stop playback.
- When stopped, press and hold **FOOTSWITCH** for 2 seconds to clear song part.
