*Danelectro always made insanely great gear.  
We pioneered tube amps in the 40's. Our guitars  
were king of the rock scene in the 50's and 60's.*

*Top players still love them.*

*Collectors snap them up.*

*Now we're back with great vintage gear.*

*Own the sounds of yesteryear!*

**HEARING IS BELIEVING.**

## INSTRUCTIONS e-15

*Connect instrument cable to the IN jack  
If using Danelectro AC Adaptor,  
connect to DC 9-Volt jack.*

*e-15 Controls are:*

- *POWER ON/OFF*
- *ECHO ON/OFF*
- *OVERDRIVE ON/OFF*
- *OVERDRIVE CONTROL: Use this to adjust the amount of distortion.*
- *VOLUME CONTROL: This controls the overall volume of output.*
- *LINE OUT JACK. Use this to send the output of the Honeytone to your amplifier.*
- *LED. Light is on when POWER switch is ON.*

*CAUTIONS: Exposure to loud music can cause temporary or permanent hearing loss.  
Take care to use appropriate volume levels through speaker or headphones.*

*BATTERY: Uses one S-006P 9-Volt Battery. Danelectro "Vintage Power Source" batteries are recommended.*

*Battery Eliminator: Uses 9-Volt battery eliminator. Polarity: Center negative (-) adaptor plug. 300mA maximum. Danelectro Zero Hum™ DA-1 Adaptor is recommended.*
