

# MPD32

MIDI/USB SOFTWARE CONTROL SURFACE

## THE PAD CONTROLLER YOU'VE BEEN WAITING FOR

The MPD32 is the ultimate velocity and pressure-sensitive pad controller for musicians and DJs. Modeled after the industry-standard MPC series, the MPD32 delivers the most expressive software beat control available anywhere.

16 velocity and pressure-sensitive genuine MPC pads provide the industry's finest feel and expression.

Four selectable pad banks for a total of 64 playable pads, eight assignable faders, eight assignable switches and eight assignable, 360° knobs for transmitting MIDI Control Change data, combine for unprecedented creative freedom. Three selectable control banks extend the number of available faders, buttons and knobs to 24 each. Two assignable footswitch inputs and an expression pedal input takes the total assignable controller count to 75—the most by far in any pad controller.

The MPD32 also features transport controls for interfacing with a sequencing application or DAW. The MPD32 is a fully-programmable controller and multi-functional control surface that fits perfectly in any production or performance environment.

## FEATURES

- MIDI synced Note-Repeat with MPC Swing
- 16 full-sized, genuine MPC pads with velocity and pressure-sensitive response
- Assignable switches, sliders and endless knobs for a total of 72 controllers
