

PROFILE PRO USB TURNTABLE WITH LINE INPUT

Rediscover all of your music.

The PROFILE series of LP-conversion systems is designed with contemporary, low-profile looks and is finished in sleek, piano black. Each model is designed to capture the music from your vinyl records and turn it into portable, flexible, digital MP3s that you can enjoy at home and on the go.

PROFILE PRO is an LP-conversion turntable with a USB output. You can easily transfer your music from records onto your computer with PROFILE PRO. ION's EZ Vinyl/Tape Converter software guides you through the steps and makes MP3 you can listen to on your computer, load onto your iPod, or record to CD. When not converting records, you can also enjoy your classic vinyl records using PROFILE PRO as a standard record player. There's even an 1/8" input so you can connect your tape deck or other music source and make MP3s from your tapes!

FEATURES

- Turn your records into MP3s using your Mac or PC
- Play records on your home stereo without needing a preamplifier
- Plug-and-play USB computer connection requires no driver installation
- 33 1/3 and 45 RPM settings
- Enables you to transfer 78 RPM albums using included software
- EZ Vinyl/Tape Converter software quickly transfers your music to iTunes
- Audacity software for reducing pops, cracks, and hiss on worn records
- Stereo, 1/8-inch input for connecting other music sources
