Do it faster with a Power Mac G5.
Designed to meet the high-performance, no-compromise requirements of demanding professionals, the new dual 2.7GHz Power Mac G5 is expandable to 8GB of SDRAM.

Feast your eyes on true color.
The 23-inch Apple Cinema HD Display delivers superb color in resolutions of up to 1920 by 1200 pixels. For the best possible monitor calibration, get GretagMacbeth's Eye-One Display.

Host a virtual meeting of the minds.
Stay connected with your creative team at corporate headquarters—or clients anywhere in the world—using the iSight camera and iChat AV software.

Go wireless.
Use AirPort to create a turbocharged wireless network at your office.

Boost productivity.
Get your work done with professional tools built for Mac OS X—and design layouts with sophisticated graphics and typography.

Awe-inspiring performance.
The ultimate creative platform.

Free your creativity with a Power Mac G5 running Mac OS X Tiger and an Apple Cinema Display. Put this proven design team—with rock-solid reliability, performance, and color management—to work for you.

Transform your creative process, from comps to layouts to final files. And from brochures to ID systems to websites, get superior results in all that you do.
