

# FORCE **i** *Powerful performances start right here.*

## Force® i 15-inch two-way full-range speaker

BIG sound in a small, lightweight package thanks to serious EV® components and our Ring-Mode Decoupling (RMD®) technology. New Barrier Port™ enclosure design delivers deeper, tighter bass than you'd expect from a small enclosure. Wide dispersion 80° x 55° horn projects the sound farther than competitive 90° speakers. Nobody else gives you this level of sophisticated design and performance anywhere near this price.

- Only 25.5 inches tall and 46 pounds for easy moving and efficient packing.
- RMD delivers incredible vocal and midrange detail and keeps sound quality even over a wide SPL range.
- EV® DH2010a 1.25-inch pure titanium compression driver.
- PRO™ driver protection circuit minimizes chance of driver failure.
- RoadWood™ enclosure with abuse-resistant black carpeting and corner guards.
- Built-in metal stand mount.

*You don't need an equipment dolly to move the Force i sub—the wheels and removable collapsing handle are built-in.*

## Force® i 18-inch subwoofer

Forget power-sucking, refrigerator-sized subs. The Force i subwoofer delivers solid, gut-kicking bass with an enclosure just over two feet high, and a single power amp. Internal input filter suppresses mid and high signals, letting the woofer put all its muscle into the low end. The Force i sub can be paralleled on a single amp channel along with the full-range speakers for very impressive sound.

- Rear-mounted wheels and collapsible luggage-style handle make moving easy. Handle can be easily removed for performances or transportation.
- Rugged, cast-frame 18-inch woofer with four-layer voice coil and tremendous excursion capability for bass down to 36 Hz.
- Comes with 30-inch pole and metal stand mount for elevating full-range speaker above the sub.

## Force® i 12-inch monitor

Force i monitor handles the critical job of giving performers on stage everything they need to hear—vocals, guitars, and drums—with pinpoint accuracy. Small and lightweight to fit on the smallest stages with 55° x 80° Constant Directivity horn for great coverage.

- Low profile and small size for minimum footprint on stage.
- 12-inch woofer has clean, yet punchy sound—good enough for front-of-house or announce use. Combine with Force i sub for a compact full-range system.
- Built-in stand mount for front-of-house or sidefill use.
- Weighs only 28 pounds (12.7 kg).

*Metal stand mounts built into all Force i speakers help you assemble an awesome-sounding system in a small footprint.*

## Eliminator® i stereo power amplifier

No other amp on the market—regardless of power rating or price—will make your Force i system sound as good as the Eliminator i amp does. Here's why: EV's built-in LPN processor is specially tuned to enhance the bass and dynamics of the Force i speakers. The Eliminator i amp can put out more than 1,000-watt peaks per channel of pure headroom power to really make your music come alive. Discover why top touring bands depend on EV power amps.

- 600 watts per channel into Force i system; 1,900 watts dynamic power.
- Dynamic limiters keep distortion low and prevent amp clipping, tremendously improving sound quality and speaker reliability.
- Complete protection circuit package for bullet-proof reliability even under abuse conditions.
- Legendary German engineering and construction quality for years of trouble-free life.
