# B

Marshall is proud to present their outstanding new two channel MB Bass Series. Designed from the ground up, these rugged amps and cabinets house incredible tone and a host of professional features.

The Marshall R&D team has worked relentlessly to produce a bass range that truly captures the essence of the Marshall sound. Scoping the entire bass playing spectrum from beginner to professional, the MB Series delivers everything from gain, worthy of the greatest rock player, to the purest crystal clean tones.

The clean thump of the Modern channel and the dirty roar of the Classic channel, every MB amp features two channels.

Taking the sound of the Classic channel even further, the MB60 and above use an ECC83 pre-amp valve to provide the best possible tone.

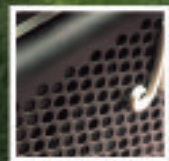

The footswitchable Blend allows you to punch in your own unique mix of both channels, creating a third hybrid sound tailored to meet your needs.

The flexible Voice Shift provides three different settings, shaping your EQ from the classic tone of vintage bass through to an in-your-face aggression.

A Variable Compressor smoothes your sound into a solid wall of low frequencies while the additional Limiter prevents power amp clipping.

Custom metal grills and corners encapsulate these rugged cabinets. With a build that matches its sound, the MB Series is up for the toughest of gigs.

Three extension cabinets give you the choice to create your perfect set-up, unlocking the full power housed within.

MBC810

MBC410

MB4210

An amp with a monstrous sound that will still fit in your car at the end of the night. The additional Blend Control straddles the channel divide and provides an extra level of footswitchable tone control, while the combined Speakon® & jack sockets complete this totally professional package.

MB15

It may be the smallest in the range, but the MB15's 1x8" speaker still packs a punch. Loaded with pro features: two channels, Variable Compressor, Emulated Line Out and Headphones socket, ensures that this is not only the best entry-level bass amp on the market, but is also perfect to warm up with before a gig.

MB30

Taking the budding bass player a step further to hitting the stage with aggression and growl, the MB30 combo is ready to take on the competition with its 30 Watts (RMS) of power and 1x10" speaker. Three position EQ Voice Shift, FX Loop and footswitchable channels add to an already impressive package.

Marshall MB450H

Don't be fooled, even in this compact form the MB450H houses a mass of power and the full line up of MB professional features. Incredible tone and feel waits inside, choose your combination of cabinets and unlock its full 450 Watts (RMS) of potential.

MB4410

For those wanting to leave a lasting impression, this top of the range combo channels its immense power through 4x10" speakers and HF horn, leaving no doubt to your presence. Totally professional, the MB4410 does not compromise.

## MB cabinets

We listened to many bass players to provide you with the most favoured extension cabinets — the MBC115 1x15", MBC410 4x10" and the colossal MBC810 8x10". Ruggedly built and ready for life on the road, these cabinets compliment your choice of combo or head perfectly.

MB60

With a valve pre-amp at the heart of its Classic channel this 1x12" combo packs a mighty bottom-end punch, making it ideal for the small gig or rehearsal room. Dedicated channel EQ and the addition of a Gain Boost switch further adds to your sonic arsenal.

MBC115

MB150

Show them you mean business with 150 Watts (RMS) of sheer bass power behind you. Housing a 1x15" speaker, this combo offers the tone, features and versatility required by any professional bass player.
