

Vocalist[®] Live Pro

Generate live multi-part vocal harmonies accompanied by your keyboard or guitar.

Any song that has the same note sung over two different chords confound conventional harmonizers.

The Vocalist Live Pro is smarter than that.

The **Vocalist Live Pro** is a rack processor based on the **Vocalist Live™ 4** that includes a new MIDI interface that works with keyboards as well as guitars. Utilizing the patent-pending **musIQ™** – technology combining new Note Detection algorithms with state-of-the-art Harmony Generation – and the raw power of AudioDNA2, the Vocalist Live Pro can create real-time harmonies with your live voice that are in key and perfectly on pitch. With all that processing power, we were able to pack it full of other features as well, including world-class Lexicon® Reverbs, Soundcraft® low-noise studio-grade mic preamp, real-time pitch correction for each voice, individual persona and gender selection per voice, configurable outputs, tuner, 99 user factory presets and more. Plus, it's available with a fully assignable optional foot switch and expression pedal so you get real time control and kick in the harmonies at just the right moment.

Powered by:

musIQ is a trademark of 3dB Research

Perfect harmonies – now for keyboards – have never been easier!

Features:
