

XD-V55 Digital Wireless Handheld Microphone

The sounds of the world's best wired mics, wireless

- Precision microphone modeling technology
- Superior 24-bit, compander-free vocal reproduction
- 4th-generation Line 6 digital wireless platform

Line 6 XD-V55 sets a new standard in professional handheld wireless systems for performing vocalists. Featuring exclusive microphone modeling technology, XD-V55 delivers the sound of the world's most popular wired mics combined with a proven 4th-generation digital wireless platform. With 12 channels of 24-bit, 10Hz–20kHz, compander-free performance, the XD-V55 provides unmatched full-range audio clarity and license-free operation worldwide.

XD-V55 gives you the flexibility to choose from four precision microphone models, so you can be confident you've got the right microphone sound to match your voice – and your performance. With the flick of a button on the mic, you can easily switch between models based on* the Shure SM58, Shure SM57, Sennheiser e 835, and L6, a custom-voiced microphone developed by Line 6.

The signal from XD-V55 is so clear and strong that it sounds just like you're using a wired microphone. Unlike traditional analog wireless, there's no compression or expansion in the signal chain. The premium cardioid capsule captures your voice perfectly and the system transmits a full 10Hz – 20kHz frequency response and wide 113 dB dynamic range, providing a huge amount of headroom for the clearest possible sound.

To ensure peace of mind and the most reliable performance, XD-V55 systems operate in the 2.4GHz band, which is free from interference due to TV broadcast, public safety announcements, cell phone towers and other transmitting devices. Encoded DCL™ (Digital Channel Lock) technology prevents reception of any audio interference from other 2.4GHz devices and ensures signal integrity.

It all combines to transmit every nuance of your performance – without degradation – up to 300 feet (100 meters).

XD-V55 Digital Wireless Handheld Microphone

The sounds of the world's best wired mics, wireless

Features

- Road-ready digital wireless system for performing vocalists
- License-free operation worldwide
- Exclusive microphone modeling technology gives vocalists a choice of four superb microphone models based on* the world's most popular mics including:
 - Shure® SM58®
 - Shure® SM57
 - Sennheiser® e® 835
 - Line 6 custom-voiced microphone
- Accurate and precise vocal reproduction with full-range 10Hz – 20kHz (-2.5dB) frequency response, wide 113 dB dynamic range (A weighted), superior transient response and 24-bit digital conversion
- Premium dynamic microphone capsule designed for spectacular vocal reproduction, and interchangeable with capsules from other industry-standard mics
- Proven fourth-generation digital wireless technology surpasses analog wireless systems in wireless reliability and sound quality
- 2.4GHz-band operation, free from interference due to TV broadcast, cell phone towers and other transmitting devices.
- 12 always-available channels
- 300-foot (100-meter) range
- One-step setup
- Transmitter LCD Display for selecting channels, battery status and more
- Dynamic Filter to combat unwanted environment noise
- Road-ready metal transmitter and receiver chassis
- FCC compliant; immune to the FCC Consumer Alert regarding wireless microphones
- System includes microphone transmitter, receiver, 2 x 1/2 wave antennas, two AA alkaline batteries

Specifications

Part Number	99-123-0115
UPC	614252990288
Case Pack	2
Case Pack Size	17" H x 8.3" W x 20.75" L
Case Pack Weight	15 lbs.
Display Box Size	14.8" H x 4.1" W x 20.25" L
Display Box Weight	6.25 lbs

Estimated FCS Date 4/23/2012
