

## MIXDECK EXPRESS

DJ Controller with CD and USB Playback

### PERFORM YOUR SETS WITH ANY KIND OF MEDIA.

There are few controllers that can claim to play just about anything you can throw at them, but MIXDECK EXPRESS is certainly one of them. The MIXDECK EXPRESS is a full-featured DJ controller that comes complete with DJ software for using your digital music library. It also has two built-in CD decks that let you perform using CDs or MP3 CDs. In addition, you can use USB Flash drives and all of it gets mixed in the same place thanks to MIXDECK EXPRESS' integrated 3-channel mixer. Slot-loading drives for your CDs make getting the tracks you want easy and fast.

MIXDECK EXPRESS also features industry-standard MIDI control on the decks and a built in audio interface to allow you to DJ seamlessly with your computer. Native Instruments Traktor LE 2 DJ software is included in Europe and Asia while Virtual DJ is included for North and South America. From the moment you unbox it, MIXDECK EXPRESS is ready to perform with your software. When you're ready to go to the gig, everything you need to connect to your sound system is built right in, including balanced XLR outs, two 1/4" mic inputs and 1/8" and 1/4" headphone output. Cue, Brake, reverse and scratching are also standard issue features on MIXDECK EXPRESS so every performance is uniquely yours to create.

The professional decks on MIXDECK EXPRESS feature large touch sensitive platters for mixing and scratching so every nuance of your performance starts reaching the audience the moment your fingers touch the platters. Seamless looping helps you put your own identity on any track live. MIXDECK EXPRESS' built-in mixer with 3-channel EQ, rotary kills replaceable crossfader and external inputs helps you mix in external playback devices or an additional microphone. Anti-Shock™ buffered skip-protection technology is included too so the audience hears a perfect show every time and you never miss a beat.
